

Template for the 5-year-term research plan

Recruitment and scientific evaluation of research professors at Luke

The maximum length of the research plan is 5 pages plus the reference list. Please use Calibri as the font (size 11 pt), line spacing 1.15 and margins 20 mm.

1. Ambitions as a research professor

- Please describe your ambitions as a research professor, e.g. in respect to the following responsibilities of Luke's research professors:
 - high-quality research and new openings in the scientific field of the professorship, and acting as a leading scientific expert in the field
 - publishing research results in peer-reviewed journals
 - mentoring early-career researchers
 - creating a broad-based project portfolio consisting of national and international funding for research and/or customer projects
 - leading, coordinating and promoting national and international research collaboration, as well as cooperation with industrial partners and other stakeholders
 - promoting the use and applications of research results, and disseminating research results to the general public (e.g. policy makers, business actors and consumers)

2. Aims and objectives

- Research questions and/or hypotheses
- Expected research results, their scientific significance and impact
- Potential for scientific breakthroughs and for promoting scientific renewal

3. Implementation

- Description and schedule of the research to be performed (incl. milestones and deliverables)
- Research data, methods and environment, and how they will support the chosen research approach
- Critical points for success, probability of risks and alternative implementation strategies

4. Collaborators and networks

- National and international collaborators and networks of key significance for implementing the research plan
- Description of what is achieved through the collaboration

5. Sectoral and societal impact

- Expected potential and application areas of the research results beyond the scientific community

6. Responsible science

- Description of how the following issues are taken into account in implementing the research plan:
 - Research ethics
 - Open science
 - Equality and non-discrimination
 - Sustainable development goals

7. References

- List of all references used in in the research plan. Please note, the reference list is not counted in the 5 pages of the research plan.

GUIDELINES AND POLICIES:
