

# Food SystemiCity programme

Food SystemiCity is a programme for business creation in cities and built environments in the global transition towards sustainable local food systems.

## Duration

02/2023 - 12/2025

## Total budget

1 436 171 EUR

## EU funding

861 702 EUR

## In the Food SystemiCity programme we:

- identify and describe potential new business opportunities related to the built environment in the transition towards sustainable, local food systems
- facilitate the discovery of suitable collaboration partners for companies across different sectors, including relevant urban stakeholders and research groups
- support co-development of new local and sustainable food solutions and seek international experts as mentors for development
- enable piloting of new solutions, including utilizing testbeds in the metropolitan area
- provide tools for assessing the sustainability and business potential of new initiatives.
